Tribridge Announces Concerto Cloud Services, a Comprehensive Suite of Cloud Computing Offerings for Microsoft Business Solutions

TAMPA, Fla. (July 6, 2011) – Tribridge (www.tribridge.com), a leading U.S.-based IT services and business consulting firm, is proud to announce their newest suite of Microsoft cloud computing offerings, Concerto Cloud Services.

[Concerto Cloud Services](#) is designed to reinvent the way companies invest in technology through comprehensive integrated online services, solutions and support. Concerto represents a deep investment and commitment to the cloud, and the dedication of Tribridge experts across the Microsoft stack.

Companies are having a difficult time finding one partner that can meet all of their public, private and hybrid cloud computing needs. As the [Worldwide Microsoft Dynamics Partner of the Year](#) (2010,2008) and one of only a handful Microsoft NSIs (National Systems Integrators), Tribridge is uniquely qualified to bring the entire solution together on a customer's terms with dedicated infrastructure, proven application and development expertise and deep industry experience.

"Whether your needs dictate an exclusively online deployment or a blended on-premise and online combination, Tribridge Concerto Cloud Services can quickly deliver flexible, integrated solutions with minimal capital investment", said [Greg Pierce](#), Managing Director of Cloud Services at Tribridge. "The bottom line is a cost-effective, monthly subscription model that provides secure access to world-class ERP, CRM and other key Microsoft solutions."

The Tribridge Concerto Cloud Services is a comprehensive suite, including:

- **Concerto Cloud Infrastructure:** In addition to cloud applications planning and support, Concerto Cloud Services include a state-of-the-art private cloud infrastructure catering to the entire Microsoft Dynamics suite, which includes Dynamics AX, GP, SL, NAV and CRM. Customers may now be up and running on a new system quickly without purchasing hardware, software or adding to in-house IT support costs.
- **Concerto Cloud Applications Integration:** Concerto Cloud Services can provide connectivity across public cloud solutions like [Microsoft Office 365](#), Windows Azure, Microsoft Dynamics CRM Online, and our own robust Private Cloud platform. However, when a greater degree of customization, integration or 3rd party applications are part of the mix, the entire solution can be deployed directly to the Concerto Private Cloud.
