Tribridge's Public Sector Work Expands Into Pennsylvania

TAMPA, Fla. (March 16, 2010) – Tribridge, (www.tribridge.com) a leading Public Sector IT Services firm, was recently approved as a vendor on the IT Services Contract for the State of Pennsylvania, offering municipalities IT solutions for cities, counties and states, as well as a variety of agencies, including transit, law enforcement, port authorities and tax collectors.

Additionally, Tribridge is working with government entities to quickly adapt to the new standards under the Open Government Directive, published by the Obama Administration late last year. Tribridge is able to help municipalities comply with the new transparency requirements with real-time access to information that can be deployed both internally and to the public, such as key information on how grant and stimulus funds are being spent, budget reports, citizen/constituent services calls and requests, along with various other important data.

“In these challenging times for government agencies across the country, our Public Sector practice helps leverage current technology to create seamless systems that enable efficiency and transparency,” said Josh Jaquish, Tribridge Public Sector Practice Leader.

Some of the entities that Tribridge has completed projects with include the Hillsborough County Tax Collector, Fla.; Florida Department of Financial Services; Pasco County Sheriff's Office, Fla.; North Carolina Department of Crime Control & Public Safety; City of Rochester, N.Y.; and Des Moines Area Regional Transit, Iowa.
